

VIRTUAL TRADE MISSION

Due to the current situation, the Polish-Portuguese Chamber of Commerce would like to offer you the opportunity to take part in a **Virtual Trade Mission**, which is an ideal solution for the current situation when there is no chance of having direct B2B meetings. We are aware of the physical distance that takes place in the business sector, that is why we are looking for a new opportunity through which your company will be able to establish business and / or institutional contacts with important partners on a given market. **Our offer of Virtual Trade Mission applies to the following markets: Poland, Portugal and the Czech Republic.**

The Polish-Portuguese Chamber of Commerce has the current market knowledge, is very well-connected in business circles from various sectors and has strong partnerships with many institutions and organizations from Poland and Portugal. **We have long-standing experience in organizing business trade missions, and we guarantee a tailor-made agenda of online B2B meetings.**

The Virtual Trade Mission will have a **strong B2B focus** on individual meetings with potential business partners, according to each company's wishes. Before the mission, we offer you a list of potential meetings, on the basis of which you will be able to define the companies that are your priority for the meeting. Moreover, we provide you necessary information about the given market (tax system and procedures), key players, competition and consumers' profile. **The Polish-Portuguese Chamber of Commerce guarantees an agenda of 6 to 7 virtual pre-defined meetings with potential business partners and clients from the Polish, Portuguese and Czech market.** After the mission, we give your company support in the follow-up. We believe that the Virtual Trade Mission will help you to gain new business contacts in such difficult economic times.
