

## Investing in Ukraine

Thursday, June 1 from 9:00 a.m. to 12:00 p.m.

Due to increased interest in investment opportunities in Ukraine, and in particular the possibility to participate in Ukraine's reconstruction program co-financed by the world's largest economic aid funds and the World Bank, leading Ukrainian law firm Engarde Attorneys at law and international law firm Garrigues have joined forces to bring entrepreneurs closer insight to the Ukrainian market and an overview of the legal considerations involved in investing in Ukraine. During this event speakers and participants will consider such questions as:

- where and how entrepreneurs from the Iberian Peninsula should look for investment opportunities in Ukraine,
- what are the current demands in Ukraine and what are the perspective investments' directions,
- what the legal environment in Ukraine looks like and what are the possibilities to invest in Ukraine,
- how entrepreneurs can best protect their investments in Ukraine.

The conference is directed at entrepreneurs from such industries as construction, energy, rail, automotive, pharmacy, IT and food.
